Interactive Quiz App

The **Interactive Quiz App** is a simple web-based application that allows users to answer multiple-choice questions and view their score at the end of the quiz. This project is built using **HTML**, **CSS**, and **JavaScript**, and is ideal for beginners learning front-end development.

✨ Features

- Multiple-choice quiz questions
- Score calculation at the end
- Clean and user-friendly interface
- One question displayed at a time
- Real-time feedback after quiz completion

⚒ Technologies Used

Technology	Purpose
HTML	Structure of the quiz application
CSS	Styling and layout
JavaScript	Quiz logic and answer validation

📂 Project Structure

```
Interactive-Quiz-App/
│
├── index.html        # Main UI
├── style.css         # App styling
└── script.js         # Quiz logic
```

🚀 How to Run the Project Locally

1. **Download or Clone** this repository:
2. `git clone https://github.com/your-username/interactive-quiz-app.git`
3. Open the folder.
4. Open `index.html` in any web browser (Chrome, Firefox, Edge, etc.).

🧠 How the Quiz Works

- Each question has 4 options.
- The user selects an answer.
- When the quiz ends, total score is displayed.
- Optionally, you can add a "Restart Quiz" button to retake the quiz.

🧩 Future Improvements

- Add a timer for each question
- Fetch dynamic questions from API
- Store high scores in local storage
- Add animations and sound effects

🤝 Contributing

Contributions are welcome!
